

VALT · OWN THE MUSIC YOU LOVE

Launch Partner Roster

Milestone 2 — Partner Songs Chosen & Ready for Launch

Project: Valt — Superfan Experience Engine (Web3 Artist Portal) | **Project Catalyst:** Fund 11, Project #1100019

Milestone: 2 — Development | **Live portal:** <https://www.valt.digital> | **Network:** Cardano pre-production testnet

Prepared: 29 June 2026 | **Revised:** 10 July 2026 (added signed-partner ledger)

1. Purpose & Criterion Mapping

This document evidences the Milestone 2 acceptance criterion: *"Have 5–10 artists' partner songs chosen and ready for launch."* It presents Valt's curated launch-partner roster — the artists and the specific songs selected to feature — alongside the platform's confirmed live, on-chain proof.

The criterion is satisfied along two dimensions:

- **Songs chosen.** Fourteen launch partners are listed below with a selected feature track each. Two are already live on the testnet, and — as of **10 July 2026** — **five artist accounts (six artist profiles) have countersigned Awen's Valt-inclusive Terms of Use (§3)**, a binding opt-in to being minted and featured on Valt. Three further confirmed independent partners (via sync.land, Valt's sister licensing platform) and eight curated target partners — drawn from a vetted pool of 119 independent artists across Africa and its diaspora (see §5) — round out the pipeline.
- **Ready for launch.** The platform is fully built and deployed at **valt.digital** on the Cardano pre-production testnet, with the complete onboarding path (artist profile → song → mint/collect → token-gated Valt) demonstrated end-to-end by the two live partners (§4). Remaining partners onboard at public (mainnet) launch — a later milestone — so as not to require artists to transact on a non-public testnet.

Honesty note: partners marked **Selected target** are curated and invited; they are not represented as having signed agreements. Six artist profiles across five accounts are **Live** / **Signed** — they countersigned Awen's Valt-inclusive Terms of Use on 10 July 2026 (§3, with the operative clauses reproduced there). Three further partners (**Confirmed**) are independent artists who have agreed to participate via sync.land, Valt's sister music-licensing platform; as partners confirm or sign, their status is updated.

2. Launch Partner Roster

#	Artist	Region	Genre	Selected song	Status	Source
1	Cullah	USA (indie)	Alt / genre-blend	Full catalog — 7 songs (e.g. <i>Warp Spasm</i>)	Live	valt.digital
2	Mie	USA (indie)	Alt / electronic	Full catalog — 5 songs (e.g. <i>Dead End</i> , <i>Beauty</i>)	Live	valt.digital

#	Artist	Region	Genre	Selected song	Status	Source
3	Frugal Stu & The Coupons	Milwaukee, USA (indie)	Disco-funk fusion	<i>City Elk</i>	Confirmed	sync.land
4	Andrew J. Lynch	Milwaukee, USA (indie)	Electronic / ambient	<i>Triangles in the Sky</i>	Confirmed	sync.land
5	Pretty Beggar	Milwaukee, USA (indie)	Indie rock	from <i>Joy and the Pursuit Of</i>	Confirmed	sync.land
6	Father Sky (Anthony Deutsch)	Milwaukee, USA (indie)	Jazz-pop / singer-songwriter	<i>Within Me, Within You</i>	Signed	sync.land
7	Ami Yerewolo	Bamako, Mali	Hip-hop / rap	from album <i>Maaya</i> (2024)	Selected target	profileability.com/ami-yerewolo
8	Nadia Mukami	Nairobi, Kenya	Afro-pop	from album <i>Queen of the East</i> (2024)	Selected target	profileability.com/nadia-mukami
9	Mavokali	Tanzania	Bongo Flava	<i>Obimo</i> (2025)	Selected target	profileability.com/mavokali
10	Mike Kayihura	Kigali, Rwanda	Afro R&B / soul-pop	<i>Come On</i>	Selected target	profileability.com/mike-kayihura
11	Nasibo Mutize	Harare, Zimbabwe	Contemporary mbira	from EP <i>Stop Over</i> (2025)	Selected target	musicinafrica.net/directory/nasibo-mutize
12	Sean Dampite	London, UK (diaspora)	Afro-fusion	<i>Jejely</i>	Selected target	seandampite.com
13	Kizaba	Montreal, Canada (diaspora)	Afro-Congolese electro	<i>Future Village</i>	Selected target	kizaba.ca
14	Timi Dre	Brooklyn, USA (diaspora)	Afrobeats / Konpa	from EP <i>Pour Toi</i>	Selected target	timidre.com

Live published on testnet, on-chain NFTs
 Signed countersigned Valt-inclusive Terms (\$3)
 Confirmed partnership agreed (via sync.land)
 Selected target curated & invited, outreach in progress

3. Signed Launch Partners — Terms Countersigned

On 10 July 2026, Awen LLC updated the Terms of Use & Copyright Policy governing its music platforms so that they **expressly cover Valt (valt.digital)**. Section 2 grants Awen and its affiliated platforms a nonexclusive, worldwide license to "mint, issue, and facilitate the sale of tokenized or NFT representations of Your Content and associated collectible or 'superfan' experiences (for example, on Valt)."

As of that date, **five artist accounts (six artist profiles)** have countersigned the updated, Valt-inclusive terms — a binding, on-the-record opt-in to having their catalog minted and featured on Valt, not merely an outreach commitment. Two are already live on-chain (Cullah, Mie). This alone satisfies the "5–10 artists' partner songs chosen and ready for launch" criterion with signed partners.

#	Artist	sync.land account	Songs	Terms accepted (UTC)	Status	Public profile
1	Cullah	CullahMusic	81	2026-07-10 20:06	Live	sync.land/artist/cullah
2	Mie	therealmie	10	2026-07-10 21:21	Live	sync.land/artist/mie

#	Artist	sync.land account	Songs	Terms accepted (UTC)	Status	Public profile
3	Father Sky (Anthony Deutsch)	adeutschmusic	10	2026-07-10 22:43	Signed	sync.land/artist/father-sky
4	W!TH (Anthony Deutsch)	adeutschmusic	10	2026-07-10 22:43	Signed	sync.land/artist/wth
5	Bryan Dove	Bryan Dove	9	2026-07-10 21:40	Signed	sync.land/artist/bryan-dove
6	Creepzz	Creepzz	2	2026-07-10 20:05	Signed	sync.land/artist/creepzz

Six signed profiles across five accounts — Father Sky and W!TH are both operated by the same artist (Anthony Deutsch). A private signature ledger — with account emails, IP addresses and exact timestamps — is retained by Awen and available to reviewers on request; personal data is intentionally omitted from this public document.

Terms excerpt — the clauses that bring Valt in scope

The two operative clauses, highlighted, from the public Terms page (sync.land/terms-and-conditions):

Awen Terms of Use & Copyright Policy - updated 10 July 2026 (excerpt)

Full terms (public): sync.land/terms-and-conditions

Section 1 - Scope: the Terms now cover Valt (valt.digital)

LAST UPDATED 10 JULY 2026

These Terms of Use and Copyright Policy (the "Terms") govern your use of Sync.Land and your submission of music and related content. Sync.Land is operated by **Awen LLC** ("Awen," "we," "us"). These Terms currently apply to Sync.Land and **Valt (valt.digital)**. If we launch a new Awen-affiliated music platform, we will give you notice and require your opt-in before extending

Section 2 - License grant: authorizes minting NFT / 'superfan' experiences on Valt

2. The license you grant

By submitting Your Content, you grant Awen LLC and its affiliated platforms and services (including, without limitation, Sync.Land and Valt) a **nonexclusive, worldwide, royalty-free license** to:

- host, store, reproduce, display, stream, and distribute Your Content on the platforms;
- license and sublicense Your Content to third parties for synchronization and master use (for example, in film, video, games, advertising, and other media);
- mint, issue, and facilitate the sale of tokenized or NFT representations of Your Content and associated collectible or "superfan" experiences (for example, on Valt), on the applicable platform's published terms;
- use your name, artist name, likeness, and profile information to promote Your Content and the platforms.

Evidence for M2 Output 3 - artist opt-in to Valt minting. Operated by Awen LLC. Governed by Wisconsin law (Section 10).

Awen Terms of Use & Copyright Policy (updated 10 July 2026), §1 scope and §2 license grant. Full terms: sync.land/terms-and-conditions · evidence screenshot E11.

4. Confirmed Live Partners — On-Chain Proof

Two artists live on testnet

NMKR pre-production

- Network: Cardano pre-production testnet

Cullah (7 songs) and **Mie** (5 songs) — **12 songs total**, each published with album art and full CIP-25 music metadata (songwriter, producer, copyright, license, genre, duration). These partners prove the full launch path end-to-end: profile → song → mint/collect → token-gated Valt.

- NMKR project: 2b486bb9-fa80-4229-...
- Policy ID: bf5a88ac0a236c22c2772a51...
- Standard: CIP-25 · numbered editions (50/song)
- Token naming: valt + slug + id (e.g. valtwarpasm258)

Tokens verifiable on preprod.cardanoscan.io under the policy id.

5. Roster Selection Methodology

The eight target partners were curated from a research pool of **119 independent and emerging artists** across continental Africa (Mali, Senegal, Ghana, Nigeria, Kenya, Tanzania, Rwanda, Zimbabwe, Angola, Ethiopia and more) and the African diaspora (UK, France, Canada, USA). Selection criteria:

- **Independent / self-managed or small-label** — aligned with Valt's artist-ownership thesis (no global major-label superstars).
- **Currently active** — verified releases or touring in 2024–2026.
- **Verifiable public presence** — each artist confirmed via a first-party site, official booking profile, or directory (source column above).
- **Genre & regional diversity** — the roster spans Afrobeats, Afro-pop, Bongo Flava, hip-hop, Afro-fusion, mbira and electronic styles across East, West, Central and Southern Africa plus three diaspora hubs.

Outreach is conducted on a **partnership basis** (free launch-partner slot, early-adopter positioning, full technical onboarding handled by Valt) rather than a paid-listing model. Detailed contact records and the full 119-artist research set are maintained as private working data and are not included in this public submission document.

6. Onboarding Readiness

The platform is built to onboard each partner with no further development work:

- **Artist & Song models** (Pods custom post types) — artist profile, song metadata, album art, artist↔song relationships.
- **Mint / Collect** — NMKR-backed minting on every song page; numbered editions.
- **The Valt** — token-gated artist content that unlocks for NFT holders.
- **NFT Monitor (admin)** — NMKR sync, bulk upload, mint event log for staging new partners.

Target partners are staged in the backend as draft artist/song placeholders pending confirmation; full minting and go-live occur at public (mainnet) launch, a subsequent milestone following security review and QA.
