

VALT · OWN THE MUSIC YOU LOVE

Launch Partner Roster

Milestone 2 — Partner Songs Chosen & Ready for Launch

Project: Valt — Superfan Experience Engine (Web3 Artist Portal) | **Project Catalyst:** Fund 11, Project #1100019

Milestone: 2 — Development | **Live portal:** <https://www.valt.digital> | **Network:** Cardano pre-production testnet

Prepared: 29 June 2026

1. Purpose & Criterion Mapping

This document evidences the Milestone 2 acceptance criterion: *"Have 5–10 artists' partner songs chosen and ready for launch."* It presents Valt's curated launch-partner roster — the artists and the specific songs selected to feature — alongside the platform's confirmed live, on-chain proof.

The criterion is satisfied along two dimensions:

- **Songs chosen.** Fourteen launch partners are listed below with a selected feature track each — two already live on the testnet, four confirmed independent partners (via sync.land, Valt's sister licensing platform), and eight curated target partners drawn from a vetted pool of 119 independent artists across Africa and its diaspora (see §4).
- **Ready for launch.** The platform is fully built and deployed at **valt.digital** on the Cardano pre-production testnet, with the complete onboarding path (artist profile → song → mint/collect → token-gated Valt) demonstrated end-to-end by the two live partners (§3). Remaining partners onboard at public (mainnet) launch — a later milestone — so as not to require artists to transact on a non-public testnet.

Honesty note: partners marked **Selected target** are curated and invited; they are not represented as having signed agreements. As partners confirm, their status is updated to **Confirmed**. Two partners (**Live**) are already published on the testnet with on-chain NFTs, and four (**Confirmed**) are independent artists who have agreed to participate via sync.land, Valt's sister music-licensing platform.

2. Launch Partner Roster

#	Artist	Region	Genre	Selected song	Status	Source
1	Cullah	USA (indie)	Alt / genre-blend	Full catalog — 7 songs (e.g. <i>Warp Spasm</i>)	Live	valt.digital
2	Mie	USA (indie)	Alt / electronic	Full catalog — 5 songs (e.g. <i>Dead End</i> , <i>Beauty</i>)	Live	valt.digital
3	Frugal Stu & The Coupons	Milwaukee, USA (indie)	Disco-funk fusion	<i>City Elk</i>	Confirmed	sync.land

#	Artist	Region	Genre	Selected song	Status	Source
4	Andrew J. Lynch	Milwaukee, USA (indie)	Electronic / ambient	<i>Triangles in the Sky</i>	Confirmed	sync.land
5	Pretty Beggar	Milwaukee, USA (indie)	Indie rock	from <i>Joy and the Pursuit Of</i>	Confirmed	sync.land
6	Father Sky (Anthony Deutsch)	Milwaukee, USA (indie)	Jazz-pop / singer-songwriter	<i>Within Me, Within You</i>	Confirmed	sync.land
7	Ami Yerewolo	Bamako, Mali	Hip-hop / rap	from album <i>Maaya</i> (2024)	Selected target	profileability.com/ami-yerewolo
8	Nadia Mukami	Nairobi, Kenya	Afro-pop	from album <i>Queen of the East</i> (2024)	Selected target	profileability.com/nadia-mukami
9	Mavokali	Tanzania	Bongo Flava	<i>Obimo</i> (2025)	Selected target	profileability.com/mavokali
10	Mike Kayihura	Kigali, Rwanda	Afro R&B / soul-pop	<i>Come On</i>	Selected target	profileability.com/mike-kayihura
11	Nasibo Mutize	Harare, Zimbabwe	Contemporary mbira	from EP <i>Stop Over</i> (2025)	Selected target	musicinafrica.net/directory/nasibo-mutize
12	Sean Dampite	London, UK (diaspora)	Afro-fusion	<i>Jejely</i>	Selected target	seandampite.com
13	Kizaba	Montreal, Canada (diaspora)	Afro-Congolese electro	<i>Future Village</i>	Selected target	kizaba.ca
14	Timi Dre	Brooklyn, USA (diaspora)	Afrobeats / Konpa	from EP <i>Pour Toi</i>	Selected target	timidre.com

Live published on testnet, on-chain NFTs
 Confirmed partnership agreed (via sync.land)
 Selected target curated & invited, outreach in progress

3. Confirmed Live Partners — On-Chain Proof

Two artists live on testnet

Cullah (7 songs) and Mie (5 songs) — **12 songs total**, each published with album art and full CIP-25 music metadata (songwriter, producer, copyright, license, genre, duration). These partners prove the full launch path end-to-end: profile → song → mint/collect → token-gated Valt.

NMKR pre-production

- Network: Cardano **pre-production testnet**
- NMKR project: 2b486bb9-fa80-4229-...
- Policy ID: bf5a88ac0a236c22c2772a51...
- Standard: CIP-25 · numbered editions (50/song)
- Token naming: valt + slug + id (e.g. valtwarpasm258)

Tokens verifiable on preprod.cardanoscan.io under the policy id.

4. Roster Selection Methodology

The eight target partners were curated from a research pool of **119 independent and emerging artists** across continental Africa (Mali, Senegal, Ghana, Nigeria, Kenya, Tanzania, Rwanda, Zimbabwe, Angola, Ethiopia and more) and the African diaspora (UK, France, Canada, USA). Selection criteria:

- **Independent / self-managed or small-label** — aligned with Valt's artist-ownership thesis (no global major-label superstars).
- **Currently active** — verified releases or touring in 2024–2026.
- **Verifiable public presence** — each artist confirmed via a first-party site, official booking profile, or directory (source column above).
- **Genre & regional diversity** — the roster spans Afrobeats, Afro-pop, Bongo Flava, hip-hop, Afro-fusion, mbira and electronic styles across East, West, Central and Southern Africa plus three diaspora hubs.

Outreach is conducted on a **partnership basis** (free launch-partner slot, early-adopter positioning, full technical onboarding handled by Valt) rather than a paid-listing model. Detailed contact records and the full 119-artist research set are maintained as private working data and are not included in this public submission document.

5. Onboarding Readiness

The platform is built to onboard each partner with no further development work:

- **Artist & Song models** (Pods custom post types) — artist profile, song metadata, album art, artist↔song relationships.
- **Mint / Collect** — NMKR-backed minting on every song page; numbered editions.
- **The Valt** — token-gated artist content that unlocks for NFT holders.
- **NFT Monitor (admin)** — NMKR sync, bulk upload, mint event log for staging new partners.

Target partners are staged in the backend as draft artist/song placeholders pending confirmation; full minting and go-live occur at public (mainnet) launch, a subsequent milestone following security review and QA.
